EXZY

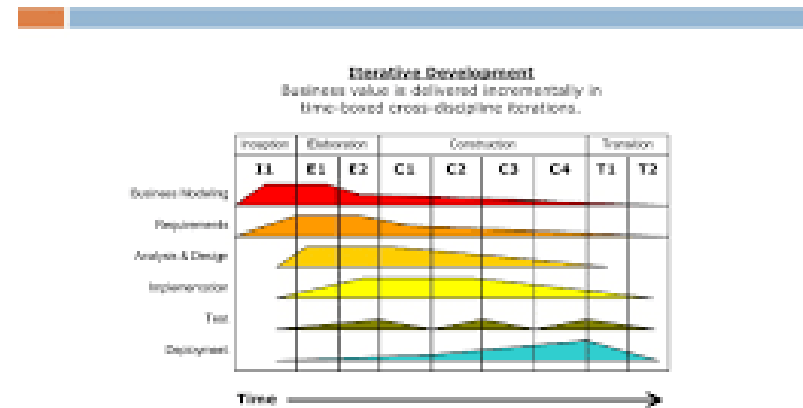

Excellence by design, Advance by technology

His Advise to Developers

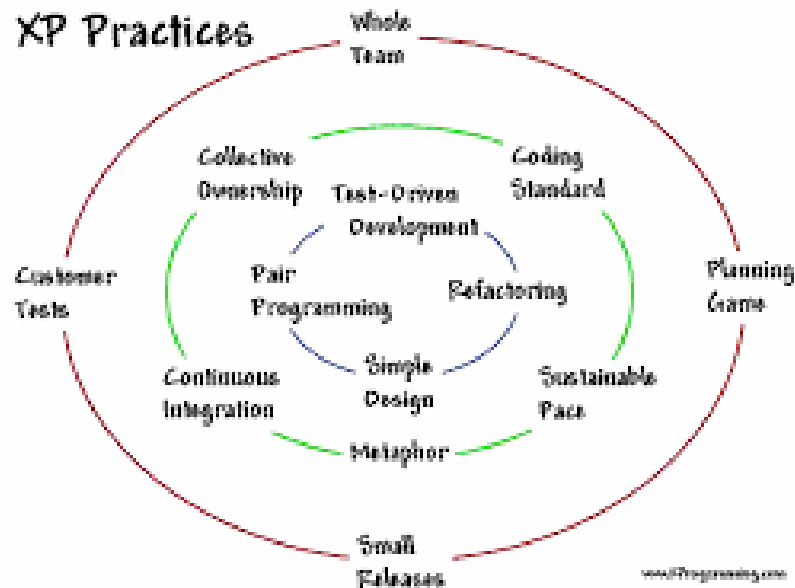

1. Know an Agile Process & Toolset

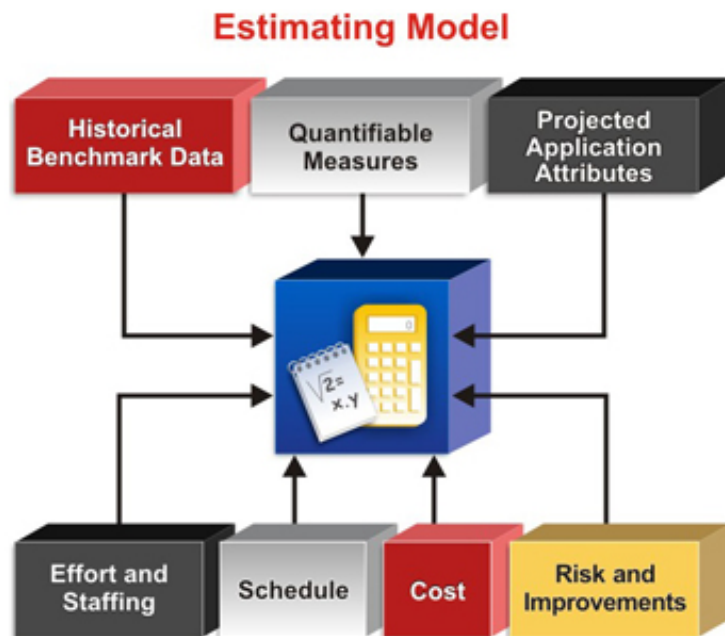

The RUP Lifecycle

XP Practices

2. Know how to do effective estimation

3. Know JavaScript

JavaScript

```
$(document).ready(function () {  
    $("#grid").shieldGrid({  
        dataSource: {  
            data: gridData  
        },  
        columns: [  
            { field: "id", width: "70px", title: "ID" },  
            { field: "name", title: "Person Name"},  
            { field: "company", title: "Company Name"},  
            { field: "email", title:"Email Address", width: "270px"}  
        ],  
        sorting:{  
            multiple: true  
        }  
    })  
})
```

4. Know a **Native** Mobile Platform

```
let node = Node(label: "TheoTest", properties:
    ["prop1": "propertyValue_1",
     "prop2": "propertyValue_2"])

let result = theo.createAndReturnNodeSync(node: node)
switch result {
case let .failure(error):
    print("Error while creating node: \(error)")
case let .success(responseNode):
    print("Successfully created node: \(responseNode)")
}
```

5. Know a Server-side Language

6. Know HTML and CSS

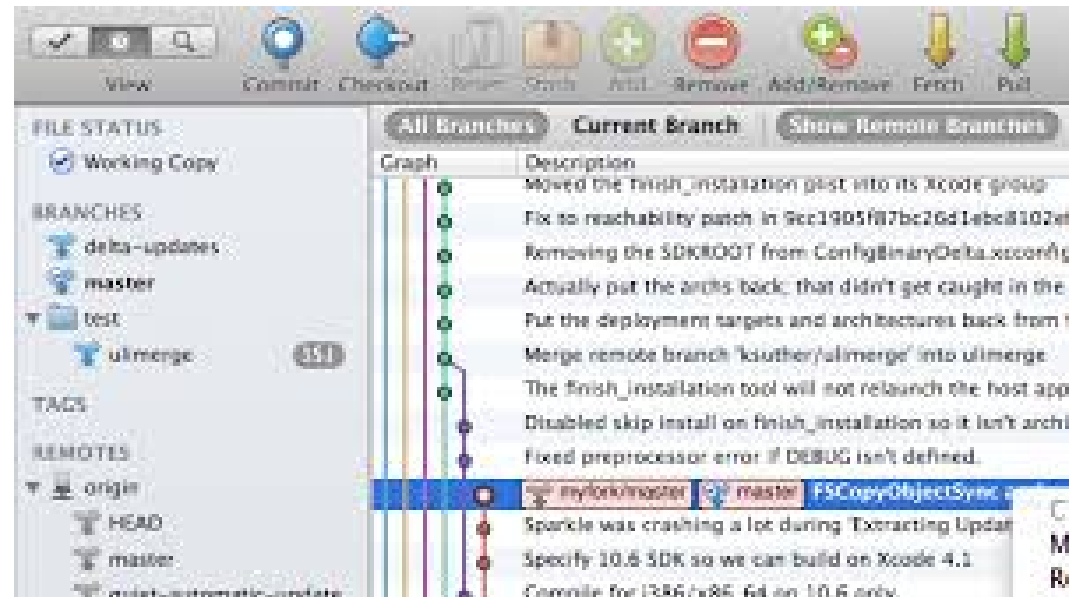

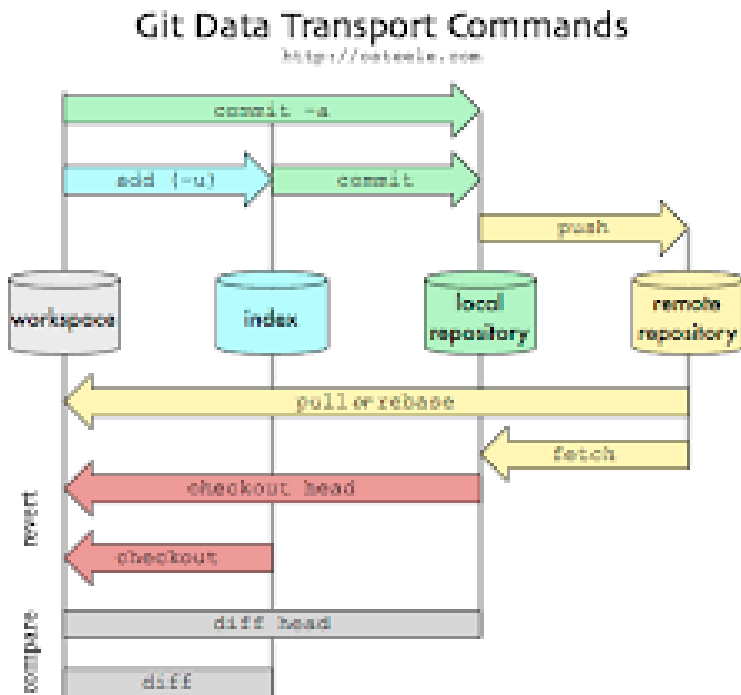

or, in actual use...

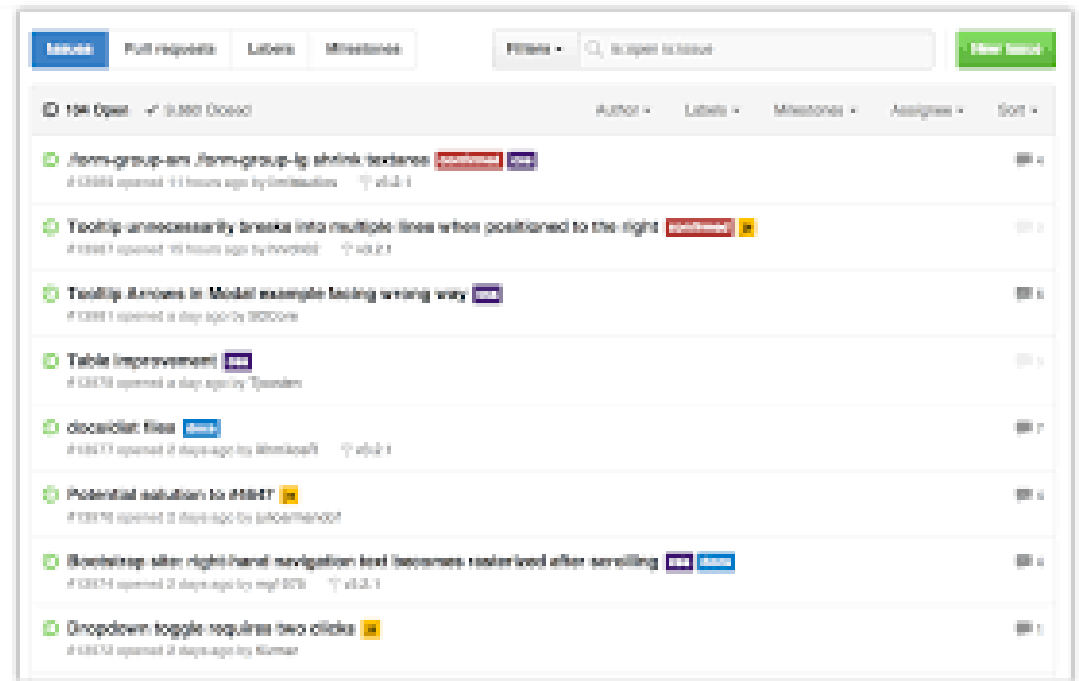

7. Know Git Really Well

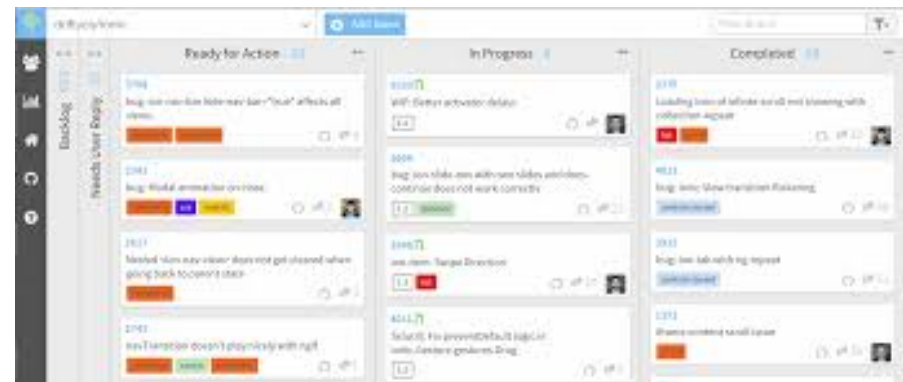

"anyone who cannot use git... cannot code"

8. Know a good tool for tracking and issues

Does this look familiar?

What is Process Related?

1. Know an Agile Process & Tool set
2. Know how to do effective estimation
7. Know Git Really Well
8. Know a good tool for tracking and issues
